

The background of the entire image is a soft, misty landscape of rolling mountains. The mountains are layered, with the closest ones appearing in shades of blue and the more distant ones fading into a pale, hazy white. The overall atmosphere is serene and natural.

# SAMUR

mineral water plant

195067, St. Petersburg, Nepokorenniyh ave, 63 of. 6/2 Tel: 8 (921) 588 84 96

A glass of clear water sits on a bed of vibrant green moss. The background is a soft-focus forest scene with various green plants and ferns. The lighting is natural, highlighting the clarity of the water and the texture of the moss.

# Samur is a unique natural place on the border of the Republic of Dagestan and Azerbaijan.

The reserve, in which water undergoes natural filtration through layers of rocks, breaks out from under the ground and, breaking up into hundreds of streams, flows into the Caspian Sea

A spring with healing water in the Samur River Valley was opened more than a century ago and is known among the inhabitants of the oldest city in Russia, Derbent. It is here, at an altitude of 1,150 meters, that we extract the Samur water, the healing properties of which are now available to you.

There are 3 brands of water (including 7 items), in the portfolio of the SAMUR mineral water plant each of them has found its own audience and is produced according to different packaging requirements and the degree of mineralization.
